

Zmiana nazwy dla ClusterSharedVolume

Polecenia wykonujemy na hoście Hyper-V, z poziomu powershell, uruchomionego z uprawnieniami administratora

Pobieranie nazwy do zmiany:

```
Get-ClusterSharedVolume
```

```
PS C:\Users\admin_tomkon> Get-ClusterSharedVolume
```

Name	State	Node
-----	-----	----
Cluster Disk 1	Online(Redirected)	FT-S002
Cluster Virtual Disk (S2D LocalDisks)	Online	FT-S001

```
(Get-ClusterSharedVolume -Name "NazwaDoZmiany").Name = "NowaNazwa"
```

```
PS C:\Users\admin_tomkon> (Get-ClusterSharedVolume -Name "Cluster Disk 1").Name = "iSCSI QNAP DISK"
PS C:\Users\admin_tomkon> Get-ClusterSharedVolume
```

Name	State	Node
-----	-----	----
Cluster Virtual Disk (S2D LocalDisks)	Online	FT-S001
iSCSI QNAP DISK	Online(Redirected)	FT-S002
