

# Sprawdzenie zajętości plików bazy danych

Wykonujemy w SSMS z wybraną bazą danych master

```
DECLARE @DB NVARCHAR(128) = 'NazwaBazyDanych';
DECLARE @sql NVARCHAR(MAX);

SET @sql = N'
USE ' + QUOTENAME(@DB) + N';
SELECT
    ''' + @DB + N''' AS DatabaseName,
    mf.name AS LogicalFileName,
    mf.physical_name AS PhysicalFileName,
    mf.type_desc AS FileType,
    mf.size / 128.0 AS FileSizeMB,
    FILEPROPERTY(mf.name, "SpaceUsed") / 128.0 AS SpaceUsedMB,
    (FILEPROPERTY(mf.name, "SpaceUsed") / 128.0) / (mf.size / 128.0) * 100 AS SpaceUsedPercent
FROM
    sys.master_files mf
WHERE
    mf.database_id = DB_ID('' + @DB + N'');';

-- Execute the dynamic SQL
EXEC sp_executesql @sql;
```
